Flexible and space-saving metering and mixing machine for the leanest dispensing applications in your lean production

With the extremely compact and lean machine B5080 all types of dispensing applications are always solved accurately and reliably. The lean machine structure meets the requirements for lean production concepts. The B5080 is characterized by a user-friendly control concept, a simple and quick commissioning, as well as significant flexibility for integration into production lines. Due to the high degree of automation our market-driven solution increases the productivity while maintaining quality.
DISPENSING MACHINE B5080 1C/2C LEAN PRODUCTION

MIXING SYSTEMS

> Single-component systems
> 2-component static mixing systems

MODULAR EXTENSIONS

> Material preparation PPS/MPS
> Cartridge system
> Material pressure tank
> Material temperature control system
> Material recirculation
> Material evacuation
> Material refill station manual or automatic
> Filling level monitoring digital or analog
> Fluid recirculation

> Process scale for shot weight control
> Dosing needle check and repositioning
> Dosing needle cleaning system
> Bar code scanner for recipe selection
> Component identification
> Data base connection MDE/BDE
> Process, product and machine data monitoring
> Integration into production lines

TECHNICAL DATA

<table>

VARIATION POSSIBILITIES

Moving carrier plate
Rotary table

(Erros and changes reserved, as of May 2014)

> Service hotline (German/English/French)
> 24h response service
> Spare parts service
> Service and maintenance
> Process and component optimization in in-house development centers
> Trials and development in well equipped technical centers
> Training for machine user, machine setter and maintenance personnel
> Seminars for machines user, machine setter and maintenance personnel
