Fully automatic metering and mixing machine for dispensing applications in high volume production

The fully automatic dispensing machine solves all types of dispensing applications accurately and reliably. The 3D axis is especially characterized by a continuous process monitoring, product data traceability during production and can be easily integrated into existing or new production lines. Due to the high degree of automation our market-driven solution increases the productivity while maintaining quality.
DISPENSING CELL B5200

MIXING SYSTEMS

- mini-dis applications
  1- or 2- component

- 1- component systems
- 2- component static mixing systems
- 2-component dynamic mixing systems

MODULARE ERWEITERUNGSMÖGLICHKEITEN

- Material preparation PPS/ MPS
- Cartridge system
- Material pressure tank
- Material temperature control system
- Material recirculation
- Material evacuation
- Material refill station, manual or automatic
- Filling level monitoring, digital or analog
- Fluid recirculation
- Process scale for shot weight control

- Dosing needle check and repositioning
- Dosing needle cleaning system
- Bar code scanner for recipe selection
- Component identification
- Data base connection MDE/ BDE
- Process, product and machine data monitoring
- Second dispensing head
- Integration into production lines and automation processes
- ESD equipment

TECHNICAL DATA
